stocks and bonds real estate hedge funds private equity the conventional way of allocating across asset classes fails to account for the overlapping risks they represent investors must consider the underlying factor risks behind asset class labels just as eating a healthy diet requires looking through foods to the nutrients they contain factor risks are the hard times that affect all assets and investors are rewarded for weathering losses during bad times with long run risk premiums optimally harvesting factor risk premiums on our own or by hiring

others requires identifying our particular set of bad times and exploiting the difference between them and those of the average investor

this book gives state of the art guidance on how to implement investment strategy with cutting edge practices of plan sponsors and investment managers all aspects of fund management will be seen in a fresh light as professionals read about current practical and theoretical twists and turns in asset allocation risk management and performance evaluation and implementation

investing can seem simple but there are an infinite number of ways to get to your goals and an infinite number of ways to fail to sharpen your investment skills this book guides you through the key aspects of the fund management profession working from a macro industry overview to the micro details of security valuation techniques combining the benefits of academic experience with decades of industry experience this is something also found in the complementary online market class investment simulator where you can manage a 100m fund in a dynamic market and your decisions and those of fellow fund managers make the market a smart investor doesn't rely on luck or guts but on learning as much as possible to make the best decisions portfolio management and market class with their uniquely rich insight into the real life workflow of portfolio management are a vital component in any investor's education

an introduction to fund management introduces readers to the economic rationale for the existence of funds the different types available investment strategies and many other related issues from the perspective of the investment manager it gives an overview of the whole business and explores the process and techniques of fund management performance measurement and fund administration this updated edition reflects new regulatory changes and industry developments

this book offers novel insights into how expert fund managers those who demonstrate superior performance over the long term make their judgments and decisions it is often claimed that actively managed funds create value for investors by making more informed decisions the general idea is that experts make judgments and decisions that will outperform passively managed funds i.e. the market although such claims seem reasonable many actively managed funds do not consistently beat the market additionally it is argued that the fees charged by actively managed funds are too high relative to the value they provide however some assert that certain fund managers do outperform the market in the long term regardless of the position one takes there is a clear need to critically examine and discuss the concept of fund management expertise the book also explores how recent and significant societal developments such as sustainability artificial intelligence and multiple accountabilities are shaping the nature of expertise today and how it might evolve in the future the book draws on both earlier research on expertise and recent publications related to business and accounting as well as insights from new empirical studies it appeals to both

scholars and professionals in finance wanting to learn about capital markets and fund management

this book explains the procedures that should be followed before investing to help you make the right investment decisions chapter by chapter the book will show you how to analyse a company's risk management strategies and its regulatory compliance
